

The Loop Service Cycle:

loopTM

Loop is principally a recycling company that specialises in the delivery of “closed loop” solutions for business and the public sector. We operate across London and the South East and, using our specialist networks, are beginning to offer “closed loop” services throughout the UK.

Recognising that recycling is only one component of any environmental programme, we also offer objective advice and support on the development of commercial strategies for improving environmental performance. This can vary from front-end advisory services, through to the specification and delivery of service contracts. Our strength is objectivity and experience.

Once your system is up and running, we will continue to provide you with after-care and support so that you can monitor its effectiveness. And as your company grows and changes, we will help you to adapt your systems so that they continue to be effective.

Our core services comprise:

- Paper & cardboard recycling
- Plastic bottle & cup recycling
- Drinks can & glass bottle recycling
- Confidential waste shredding & recycling
- IT equipment recovery
- Toner cartridge recovery and re-supply
- Fluorescent tube recovery
- General waste management

Our advisory services include:

- Environmental policy and systems development
- Compliance and systems auditing
- Energy efficiency
- Paper specification
